SENTIMENTAL ENERGY

30th April 2025

Editor's Note

April has been a month of impactful partnerships, vibrant participation in key industry events, and inspiring progress on our clean energy projects. At Sentec, we believe in not just providing sustainable energy solutions but also being part of the transformation of communities and institutions. This newsletter brings you highlights of the milestones we achieved this month, including strategic collaborations, successful project handovers, and national-level engagements. Thank you for staying connected with us as we illuminate lives across the region.

Warm regards,
Mary Wangare

Marketing Assistant , Sentec

Sentec Partners with KCB

Sentec Shines at Solar Week Kenya!

**Our Projects Spotlight: CITAM
Parklands and Schools**

**Participation at Kenya Private
Schools Association AGM**

Citam Parklands church Handover

MESSAGE FROM OUR DIRECTOR

Dear Partners, Clients, and Friends,

I am humbled and inspired by the incredible progress we have made this April. Each achievement this month has reminded us why we do what we do—to transform lives through clean, accessible, and reliable energy. Sentec has never just been about selling solar systems. We are here to spark a movement, to be a vessel through which homes are lit, schools are empowered, churches are strengthened, and businesses are sustained.

Our partnership with KCB Bank marks a monumental step toward inclusive energy financing. We understand that many Kenyans are eager to adopt solar solutions but are held back by initial investment costs. This collaboration directly addresses that challenge, opening up flexible, affordable options for families, entrepreneurs, and institutions to transition to solar without financial strain. It is a clear demonstration of our dedication to sustainable impact through innovation and accessibility.

We also had the honor of showcasing our capabilities at Solar Week Kenya, where industry leaders came together to share insights and drive dialogue around the future of renewable energy in Africa. It was inspiring to see the level of commitment from both private and public sectors in accelerating the clean energy transition. Sentec stood out as a solutions-driven brand with a community-first approach something we remain incredibly proud of.

We continued our mission of energy equity by implementing systems in schools, providing young learners with a consistent and conducive learning environment powered by clean energy. Through our participation in the Kenya Private Schools Association AGM, we engaged with education leaders on long-term solutions that can transform schools across Kenya especially those in underserved regions.

Looking ahead, our focus remains on scaling impact, strengthening strategic partnerships, and continuing to innovate in ways that put people and the planet first. As we embrace the months ahead, let us remain rooted in purpose and bold in vision. The future of energy is here, and it is green, inclusive, and community-driven. With gratitude and purpose,

Eng. Paul Simiyu,
Managing Director,
Sentimental Energy

SENTEC PARTNERS WITH KCB: FINANCING SOLAR FOR ALL .

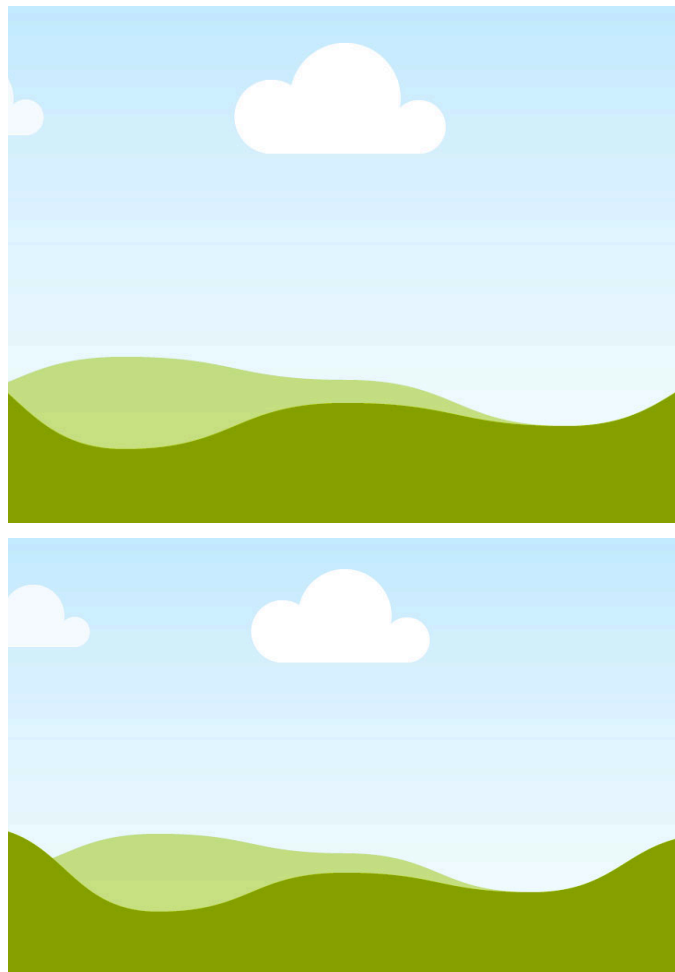

In a bold move toward inclusive clean energy access, we partnered with KCB Bank to offer flexible solar financing to schools. This partnership is designed to eliminate the financial barriers that often discourage institutions from embracing renewable energy.

Through tailored loan products, KCB customers can now acquire solar systems with manageable repayment plans—making clean energy more affordable than ever.

So far, we've successfully powered several schools under this initiative, helping them reduce operational costs and improve learning conditions through reliable, sustainable energy. The future is bright—and solar powered—as we continue to expand this partnership and reach even more schools across the country.

This collaboration reflects our shared vision to power Kenya sustainably, while also empowering households and institutions to take charge of their energy needs.

It is not just a financial product—it's a pathway to energy independence and environmental responsibility.

SENTIMENTAL ENERGY

In Partnership with

Solar Energy

For Schools

✓ Cut power bills by 100% with solar

✓ Fully financed by KCB at 9.75% p.a. - no collateral

SENTEC SHINES AT SOLAR WEEK KENYA 2025 !

This year's Solar Week Kenya was nothing short of electric! Sentec was honored to attend the event and celebrate a major milestone in our journey. Organized by SolarQuarter Global, the gathering brought together key players in Africa's solar energy sector—government bodies, innovators, financiers, and changemakers—united by a shared mission: to accelerate clean energy adoption across the continent. The true highlight for Sentec came during the SolarQuarter Global Awards, where we were humbled to receive four prestigious accolades. It was a proud and emotional moment for our team, as these awards recognized not only our technical innovation but also our deep-rooted commitment to sustainability, equity, and meaningful impact in the communities we serve.

Award Highlights:

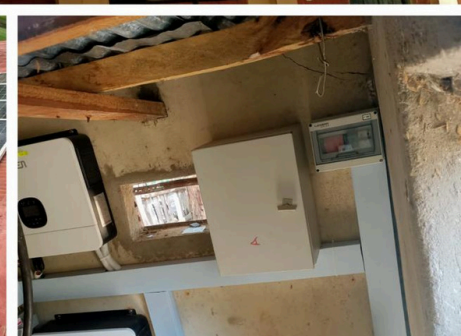

- Company of the Year – Innovative RE Initiative
- Sustainability Leader/Team of the Year – CSR Excellence
- Project of the Year – Sustainable Finance and Investment
- Best Solar Project Deal of the Year – Kajiado County Ministerial Offices

From powering rural schools and reducing county energy bills, to offering financing models that break down barriers to clean energy access—these honors affirm that our work is changing lives.

We dedicate these awards to every school, county, business, and household that has entrusted us on their energy journey. To our partners, clients, and the ever-passionate Sentec team—thank you. The future is green, and we're just getting started.

PROJECT SPOTLIGHT: SOLAR FOR SCHOOLS

Under our transformative partnership with KCB Bank, Sentec continues to deliver on the promise of energy equity through the "Solar for Schools" initiative. This program enables schools to access solar energy solutions through flexible financing options—reducing their operational costs while enhancing learning environments with clean, reliable power.

We are proud to have successfully completed installations at the following schools under this initiative:

- Lukhokho Secondary School – Kakamega County
- Lwandeti Secondary School – Kakamega County
- Friends School Maturu – Kakamega County
- SA Forestral Secondary School – Bungoma County

These projects have empowered the schools to save significantly on electricity bills, improve classroom lighting, and ensure uninterrupted use of ICT and science labs. Most importantly, they demonstrate that with the right partnerships, even rural and underserved schools can be part of Kenya's clean energy future. Sentec remains committed to expanding this impact one school at a time.

SENTEC AT KPSA AGM: POWERING EDUCATION WITH SOLAR

We proudly participated in the Kenya Private Schools Association (KPSA) Annual General Meeting, a key platform that brought together education leaders, school proprietors, and partners to chart the future of private education in Kenya. Our presence at the AGM underscored a critical message: clean, affordable energy is essential for modern, resilient learning environments. We were not just exhibitors but changemakers championing sustainable solutions that create healthier, smarter, and more cost-effective learning environments.

A major highlight of this year's conference was the impactful collaboration between Sentec and KCB Bank, working together to make clean energy adoption a reality for schools through fully financed solar solutions. Through this partnership, KCB is providing 100% financing, enabling schools to adopt solar energy solutions with ease—removing financial barriers and allowing institutions to make impactful transitions without the need for upfront capital.

Through interactive sessions and one-on-one consultations, we engaged school heads and board members on how our solar financing solutions—especially through our KCB partnership—are helping schools overcome electricity challenges. From reducing costs to enabling 24/7 access to digital learning tools, Sentec presented real-life impact stories of schools already benefitting from our solutions.

The event gave us a valuable opportunity to not only raise awareness but also listen—understanding the energy challenges schools face and co-creating sustainable, budget-friendly solutions. We look forward to deepening our collaboration with KPSA member schools and transforming more classrooms across the country through solar power.

CITAM PARKLANDS HANDOVER: POWERING FAITH SUSTAINABLY

April concluded on a high note with the official handover of the CITAM Parklands solar power project. In a special dedication ceremony attended by the church leadership, project team, and Sentec engineers, the system was officially commissioned. The high-capacity solar solution is now powering key facilities within the church compound, reducing reliance on grid electricity and supporting the church's mission with energy that is clean, reliable, and cost-effective. The handover marked more than the completion of a project—it celebrated a shared vision of stewardship, community, and sustainability. We are deeply honored to partner with institutions like CITAM in bringing faith and technology together for a better tomorrow.

A Heartfelt Thank You

We would like to extend our deepest gratitude to all the participants, partners, and special thanks to KCB Bank for being an incredible partner in our Solar for Schools initiative and for enabling us to bring clean, sustainable energy solutions to educational institutions across the country. Together, we are building a brighter, more sustainable future for our children and communities. We look forward to continuing this journey with you, making a lasting impact on the education sector and empowering generations to come.
